MAR SUNBED OUTDOOR

FRANCESCO ROTA

NEW DESIGNS

The Mar sun lounger is a minimalist piece featuring clean, horizontal lines, made entirely of Pure ECO® thermopolymer—a 100% recycled and recyclable material—which gives it a uniform, contemporary look. Despite its apparent simplicity, Mar features a reclining backrest with adjustable positions that allows the user to switch between various resting positions, and it has two built-in rear wheels that make it easy to move or reposition.

In addition, its design allows multiple units to be stacked securely, optimizing off-season storage space. To enhance the experience, a specially designed upholstered cushion is available: a quick-drying foam cushion offered in a wide range of fabrics, which adds comfort while maintaining the set's understated elegance.
