MASTER CONFERENCE TABLE

ESTUDIO ANDREU

NEW DESIGNS

The Master Conference Table is designed for corporate spaces that require a sense of prestige and flexibility. Its design allows the distinctive cylindrical base—available in a metal or wood finish—to be paired with different tabletop shapes—rectangular, boat-shaped, and rounded square—adapting to various room sizes and styles.

The range of finishes available for the tabletop allow its character—whether warmer, more technical, or understated—to be tailored to the project. The tabletop's construction allows for the discreet integration of connectivity, enhancing its functionality without compromising its aesthetics. Clean lines and balanced proportions give the Master Conference Table a refined and professional character, making it ideal for boardrooms and high-end spaces.
