VEST CHAIR

ESTUDIO ANDREU

NEW DESIGNS

The Vest Chair was conceived as a hybrid between a chair and a compact armchair. It is fully upholstered, giving it a warm, homey look that is unusual in the contract sector. Its wraparound upholstered shell—with soft edges and subtly defined arms—offers a cozy seat without being overly bulky, making it ideal for hospitality spaces or lounge areas where the goal is to combine comfort with contemporary aesthetics.

Beneath its unassuming appearance, the Vest Chair conceals an ingenious onepiece structure made of recycled Pure ECO® thermopolymer, which makes it lightweight yet sturdy enough for everyday use. The legs are part of this structure and are molded from the same material, always finished in black to create a unified look for the base.

SO3036
Armchair with upholstered shell and a 4-legged base in Pure ECO® (100% recycled) thermopolymer finished in black.
