

Tamara Table

Philippe Starck

Tamara Table is an exemplary table, the result of a careful manufacturing process where the details have been worked out to reach a design remarkable for its personality and attractiveness, which allows a hybrid use in the new public and private spaces.

A revolutionary table concept, based on the constructive interlocking of flat pieces of ecological plywood to form a three-dimensional structural assembly of great strength and solidity, without using adhesives or glues, all with flat packaging and minimal environmental impact.

Its exceptional aesthetics and structural system brings to mind Japanese wooden ship constructions offering a robust and useful design in return. Tamara is a collection of tables made of oak plywood. The rectangular table top is available in 4 sizes and is available in oak plywood, linoleum, marble or smoked glass.

It functions as a multipurpose table for workspaces, meeting and lobby areas or residential use. It is a collection intended for the circular economy, with a minimal carbon footprint and designed so that all components are easily separable and recyclable at the end of their useful life.

ANDREU WORLD

Tamara table is a collection of tables made of oak plywood.
The rectangular top is available in oak plywood,
in linoleum, marble and in smoked glass.

Table in oak plywood with rectangular top available in oak, linoleum, smoked glass or marble.
